SUMMARY

Entry-level Game Developer with a strong interest in game programming and interactive experiences. Familiar with Unity and basic C# scripting through personal learning and small projects. Highly motivated to improve technical skills and gain real-world experience in game development.

EDUCATION

Software Engineering | 2022-2027

Posts and Telecommunications Institute of Technology – PTIT, Hanoi

PROJECTS

2D Puzzle – Drag & Drop Block Placement

- Developed a 2D block puzzle game using Unity with drag-and-drop placement and dynamic grid system.
- Implemented core gameplay logic including shape spawning, line clearing, scoring, and game over detection.
- Applied design patterns (Singleton, Observer, Object Pooling) to ensure modular and scalable architecture.
- Built save/load system using JSON and PlayerPrefs for persistent game state.
- Github: https://github.com/Dung1409/2D_Puzzle

Game 2048

- Developed a 2048 puzzle game using Unity with clean and modular architecture.
- Implemented tile movement, merge logic, game state validation, and scoring system.
- Built Undo (1-step rollback) and auto save/load using JSON and PlayerPrefs.
- Applied design patterns (Singleton, Observer, Object Pooling) to improve performance and maintainability.
- Github: <https://github.com/Dung1409/2048-Game>

TECHNICAL SKILLS

Programming: C#, C++, Python, Java

Game Development: Unity, Game Architecture, Design Patterns (Singleton, Observer, Object Pooling)

Tools & Technologies: Git, JSON, PlayerPrefs

Fundamentals: Object-Oriented Programming, Data Structures, Debugging

ADDITIONAL

Soft Skills: Teamwork, adaptability, strong willingness to learn and improve

English: Basic reading and understanding of technical documentation
